"MCCLINCY Matt"

Hello James.

I needed to come into the office to take care of a couple of items before the weekend and saw your e-mail below. I'm sending this e-mail to further clarify DEQ's position regarding the focus of our next meeting.

DEQ considers scaling up enhanced in-situ bioremediation (EIB) in the vicinity of the former solvent UST system (i.e., VOC source area) to be the priority for Siltronic's at the site. DEQ's objective for the next meeting with Siltronic is to discuss scaling up EIB in the vicinity of the former solvent UST system.

Regarding meeting to discuss the use of EIB along/near the shoreline and/or sequencing EIB with NW Natural's SCMs, these are matters separate from scaling up EIB in the VOC source area, and ones in which DEQ has made a determination. Your e-mails from Wednesday and yesterday, indicate that Siltronic recently discussed topics covered by DEQ's source control determination with EPA. As such, DEQ and EPA will need to follow-up on the nature of those discussions before making arrangements to meet with Siltronic.

I understand from your e-mail that Siltronic has availability during the week beginning April 7th. Upon my return Wednesday, I will try to coordinate DEQ's schedules for a meeting that week with the Siltronic team to discuss scaling up EIB in the vicinity of the former solvent UST system.

Mr. Dana Bayuk, Project Manager
Cleanup & Portland Harbor Section

Subject: Siltronic, DEQ and EPA Meeting

Jim, Matt, Dana – I received a call from Rene and Kristine at EPA as a followup to our meeting last week in Seattle. We discussed the concept of a sequenced approach for integrating upland source control measures with the in-river early action as proposed by NW Natural. We agreed that a meeting with DEQ, EPA and Siltronic to discuss a comprehensive remedy that addresses

both upland and in-river impacts is appropriate, and should occur fairly soon. We have time available next week and the week of April 7th, but little or no availability during the week of the 14th. Please let us know if there are open dates for us to get together.

Thanks

James
